EDUCATION

University of Waterloo

Waterloo, ON

BASc, Honors Systems Design Engineering

Sep. 2025 – Apr. 2030

- **Coursework:** Calculus 2, Matrices & Linear Systems, Human Factors in Design, Digital Systems, Data Structures & Algorithms, Business Tech & Infrastructure

TECHNICAL SKILLS

Languages: Swift, Python, Java, JavaScript, TypeScript, C/C++, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, SwiftUI, Node.js, Material UI (MUI), Tailwind CSS, MediaPipe, Zustand

iOS & Tools: Xcode, Core Data, TestFlight, Git, GitHub, Docker, Vite, pgAdmin, Datadog, Figma, Firebase

Other: REST APIs, LLM/Gemini integration, WebAssembly, SolidWorks, MATLAB

EXPERIENCE

Software Developer

May 2026 – Present

UW Blueprint

Waterloo, ON

- Implemented new features by translating design specs into production-ready components and resolving local development/environment issues to ship software supporting nonprofit clients
- Building and maintaining internal tools and a recruitment platform (React, MUI, TypeScript) to streamline team workflows across 10+ teams consisting 150+ members, contributing code reviews and PR iterations

Software Engineer

Jan. 2026 – Apr. 2026

TextNow

Waterloo, ON

- Shipped a scrollable rewarded-ad feature in Swift on the ads team, touching every ad surface across a free, ad-supported app with 10M+ users and a 4.8-star rating, lifting rewarded-ad engagement by 23%
- Analyzed impression and fill-rate data, to increase ad monetization and improving eCPM across placements
- Diagnosed and resolved production crashes and app hangs flagged by Datadog spikes following new releases, reducing ad-surface crash rate by 41% and improving release stability
- Shipped new ad designs behind feature flags for gradual rollout, validating each through TestFlight builds and testfests across physical iOS devices to catch device-specific regressions before production

Point of Sales Software Developer

Nov. 2024 – Dec. 2025

Pospify

Toronto, ON

- Built and maintained POS software deployed across 5 small businesses, handling transactions and inventory workflows with integrated receipt printers and card readers for end-to-end payment processing
- Ran live demos and debugged customer-reported issues on-site, shortening issue-to-resolution time
- Integrated TD Merchant Solutions payment terminals with the POS via semi-integrated terminal protocols

Software Developer (iOS)

Jan. 2024 – Jun. 2024

Apple & Career Education Council

Remote

- Designed and shipped Study Sphere, an iOS study app built in Swift meant to connect students in universities
- Earned Apple Certification in App Development with Swift through self-directed coursework in Xcode
- Pitched the app to a panel of industry software experts at Develop the Future Apple Convention

PROJECTS

Rehably 🦿 | *MediaPipe, WebAssembly, Web Speech API, Node.js*

Hack Western 2025 (MLH)

- Built a rehab tool for older adults using MediaPipe pose detection (via WebAssembly) for real-time knee-angle tracking, rep counting, and asymmetry detection during sit-to-stand or hand movement exercises
- Added voice-based form feedback via the Web Speech API for accessibility, and generated post-session PT reports through an LLM-backed Node proxy with a deterministic fallback when the API failed

ReceiptJars 🦿 | *React, TypeScript, Vite, Zustand, Gemini API*

SheHacks 2026 (MLH)

- Built a personal finance app that turns receipts and photos into a memory collage while tracking spending, using the Gemini API to auto-extract purchase details (merchant, date, total, category, items) from uploaded receipts
- Generated category-level spending breakdowns and AI-driven budgeting insights and advice, backed by Zustand state management with a model fallback when the API rate limits

COMMUNITY INVOLVEMENT

Executive Technology Chairperson

CREATE Markham, Non-profit Organization

Jul. 2022 – Aug. 2025

Greater Toronto Area, ON

Information and Communications Technology Executive

Specialist High Skills Major Council

Jun. 2023 – Jun. 2025

Markham, ON
